

Full digital ecosystem for complex R&D projects in life sciences

Augmenting the digital capabilities of scientists to accelerate complex R&D projects

december
1999 |

Over 90%

of scientists cannot efficiently harness data in biotech projects

Current solutions are scattered & painful

Most data is still untapped

Loss of time and value

Cut down R&D timelines and costs by enabling universal access to data at every stage of the R&D value chain

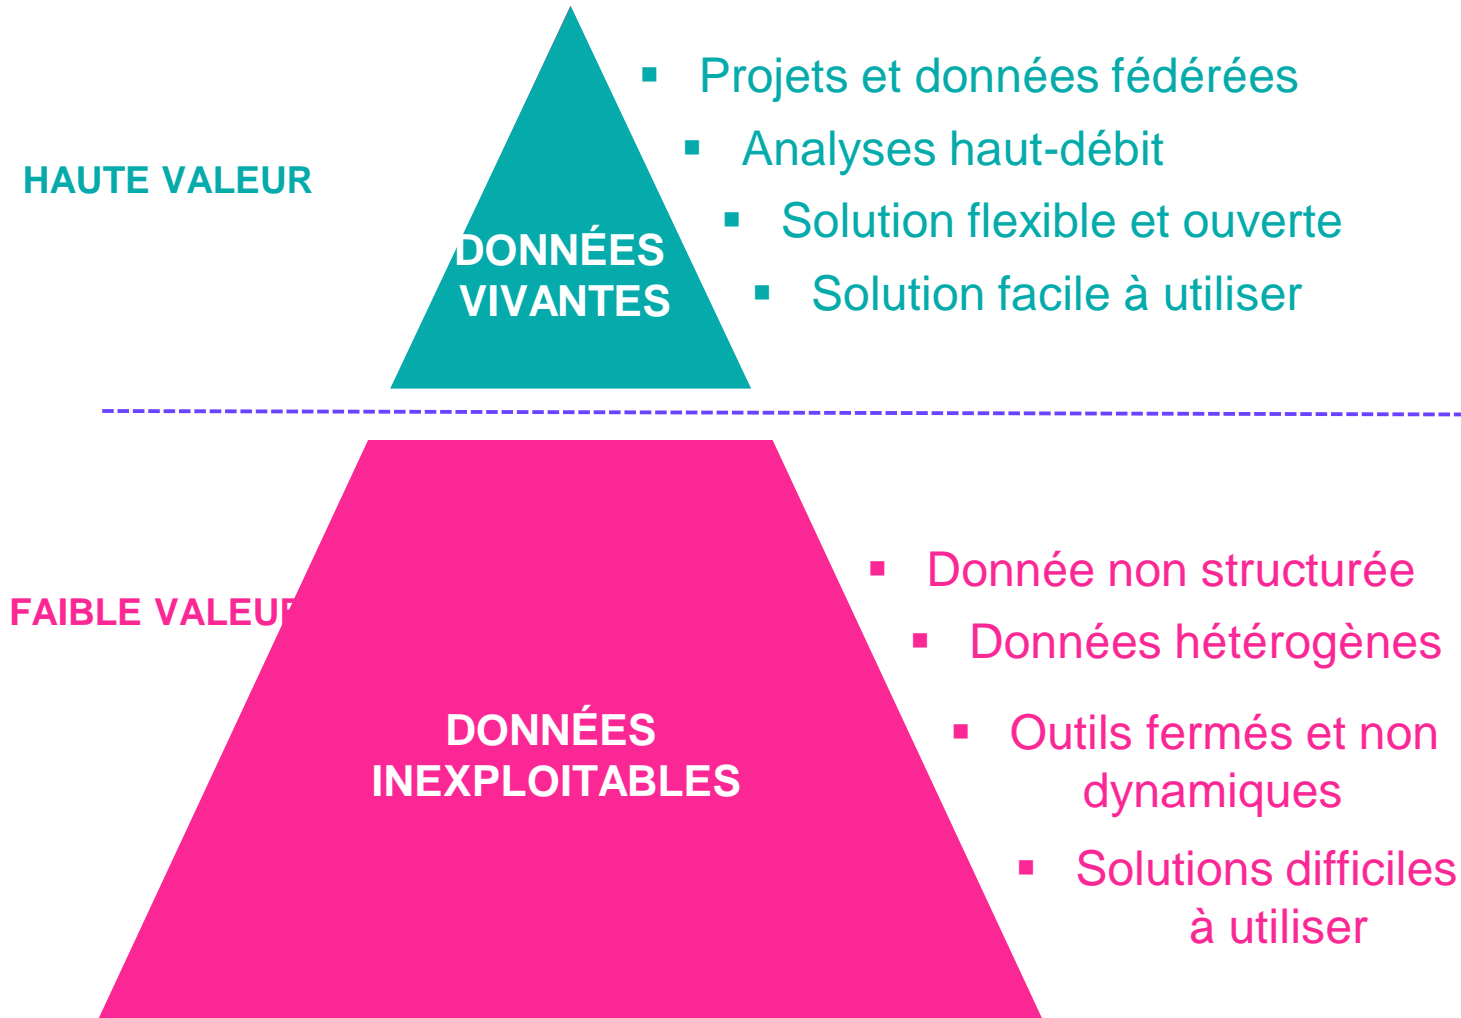

Acceleration of digital transformation by a factor of 6

Acceleration of R&D

AMÉLIORER LES CAPACITÉS NUMÉRIQUES DES SCIENTIFIQUES

NOTRE VISION

Réduire drastiquement les temps de R&D en permettant un accès universel aux données à chaque étape de la chaîne de valeur des projets complexes

On anticipe une réduction des coûts et délais de R&D d'un facteur 2 (i.e. \$150 bn / an)

Connecting all stages of the value chain into a single easy-to-access digital ecosystem

OLD PARADIGM

NEW PARADIGM

R&D lab data

UNE PLATEFORME PROPRIÉTAIRE POUR EXPLOITER LA DONNÉE

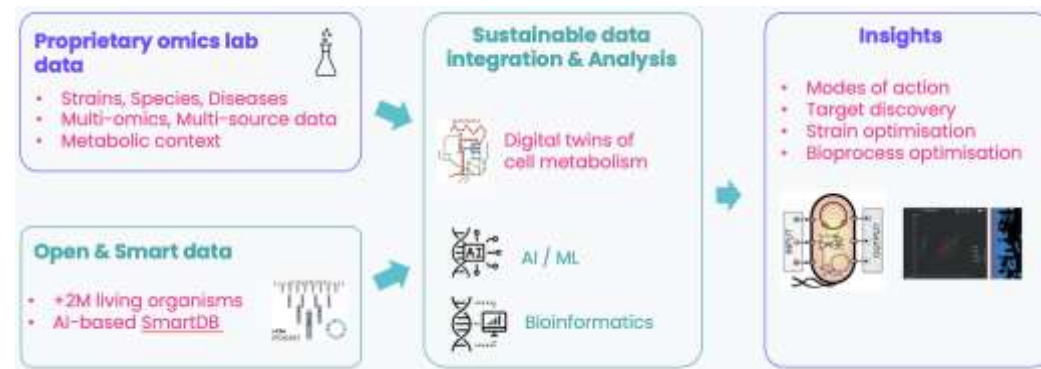

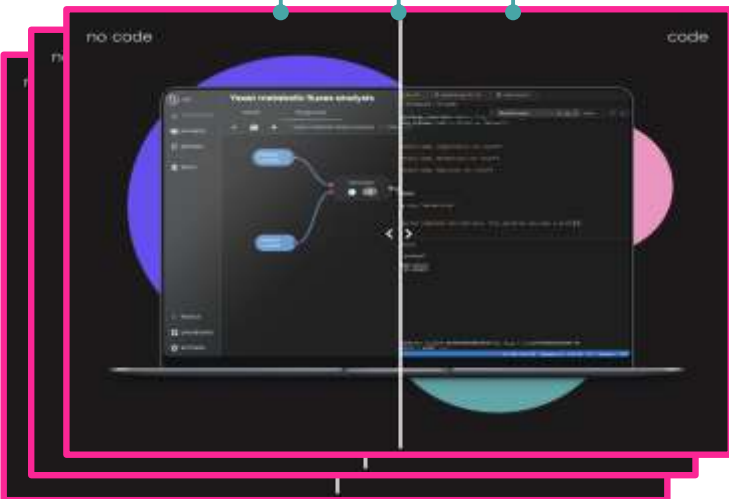

GENCOVERY A DÉVELOPPÉ UN ÉCOSYSTÈME DIGITAL COMPLET POUR BOOSTER LES PROJETS DE R&D COMPLEXES : CONSTELLAB™

TABLEAU DE BORD COLLABORTIF

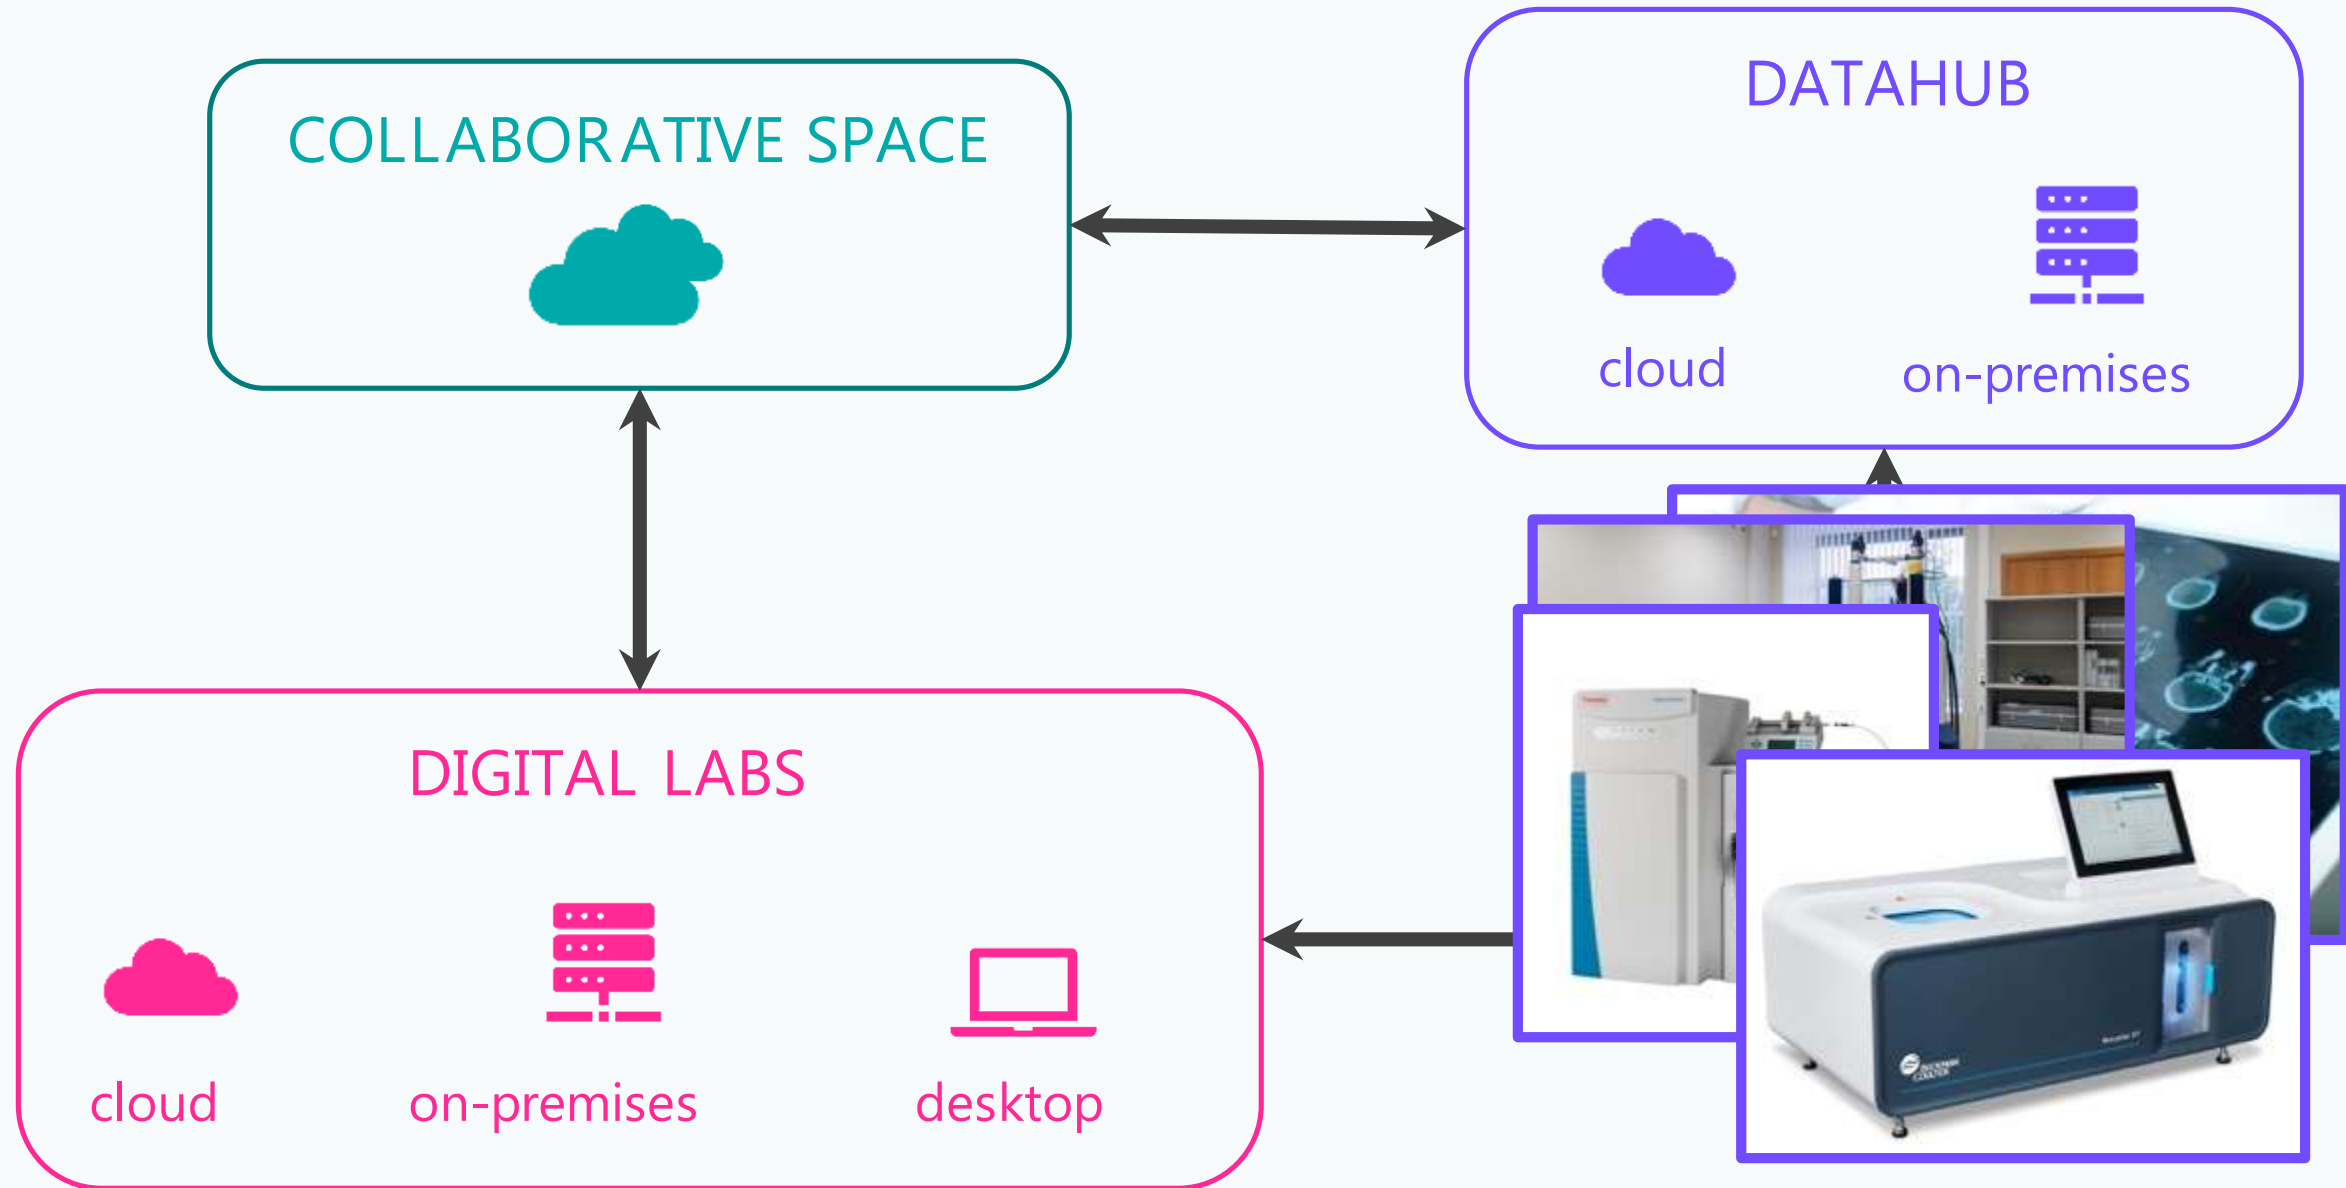

LABORATOIRES NUMÉRIQUES

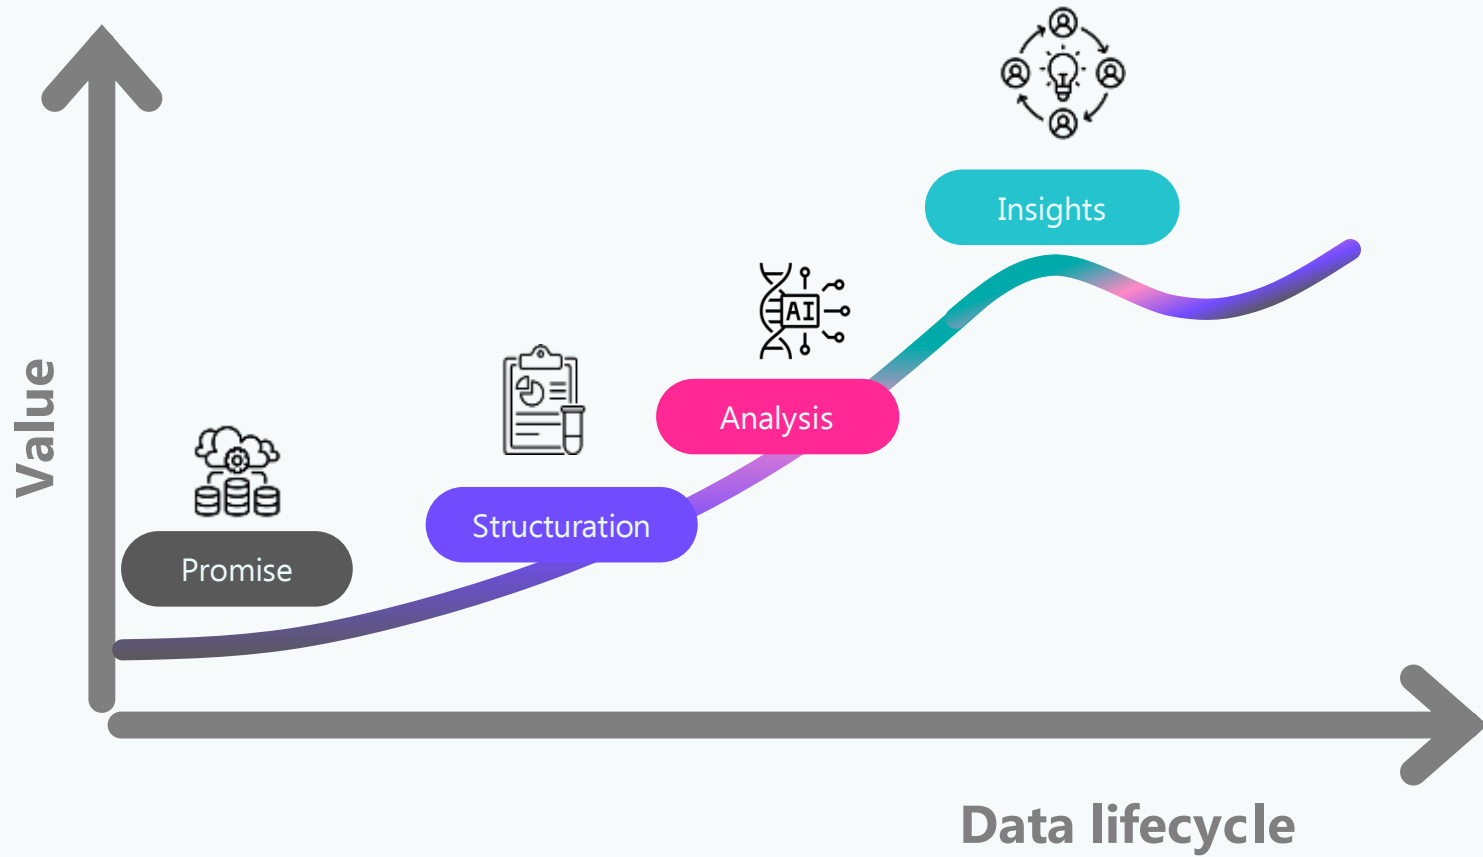

GENCOVERY ACCÉLÈRE LA R&D NUMÉRIQUE D'UN FACTEUR 6 !

Federate your equipment data for high-throughput analytics

Constellab™ gives life to data & supercharge complex R&D projects

**Boost of digital pipelines
X 6**

**Easy and fast adoption in 4
hours**

Improvement of quality

Constellab™ speed-up digital pipelines by a factor of 6

- is deployed in few minutes⁽¹⁾ or days⁽²⁾
- is adopted within few hours⁽³⁾ and easy to maintain
- is secured and ensures data sovereignty⁽⁴⁾
- is open source for sustained longevity

(1) in any cloud infrastructure (OVHcloud, Microsoft AZURE, AWS, ...)

(2) on company's premises

(3) within 4 hours – validated with 40 bioengineering students

(4) in any region of the world

Our expertise to boost
your digital R&D

Digital twins & artificial intelligence

Multi-omics data analysis

Visualization and reporting

Development of proprietary bricks

We sustainably answer bottlenecks in the major biotech industries

They trust us

Crop disease analysis service
(Digital twin, agronomy)

Omics data analysis with Constellab™
(Microbiota, Nutrition)

Global digitalization of R&D and
bioproduction (Digital twin, CDMO)

In silico metabolic modelling with
Constellab™ (Digital twin, Health)

Student training with Constellab™
(Education, Engineering school)

An end-to-end service for your complex R&D projects

Consulting & Diagnostic of complex projects

Digital labs & IT infrastructure & Multi-cloud

Constellab
Lab memory

Data analysis
AI & Digital twins

Complex collaborative
projects

Subscription

Standard consulting

Complex consulting

Self-managed projects

Custom
Support

Custom
pipelines

Shared bioinformatician

An experienced team for your complex R&D projects

R&D

Omics data,
Bioinformatics & AI

3 PhD & 3 Engineers

Thibault ETIENNE
R&D leader

Product

Software & Cloud
computing

4 Engineers, 1 PhD

Benjamin MAISONNEUVE
Lead software engineer

Business

Sales & marketing

2 business

Florent TESTUD
Business Director

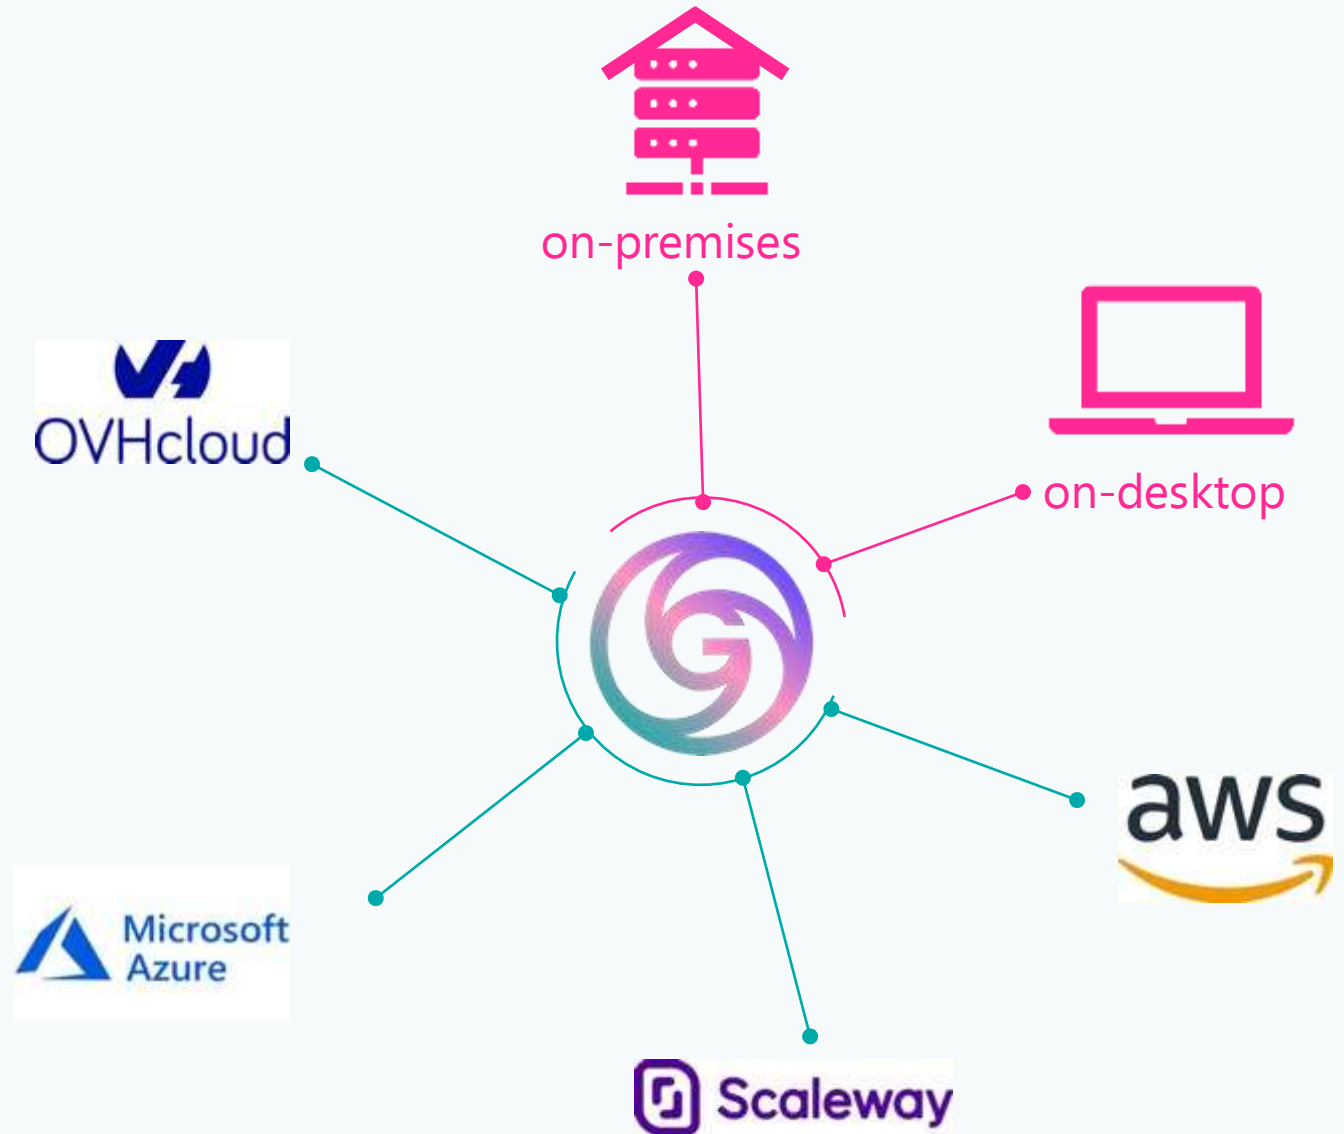

A secured multi-cloud & on-premises platform for next generation R&D

**Data
Interoperability &
Sovereignty**

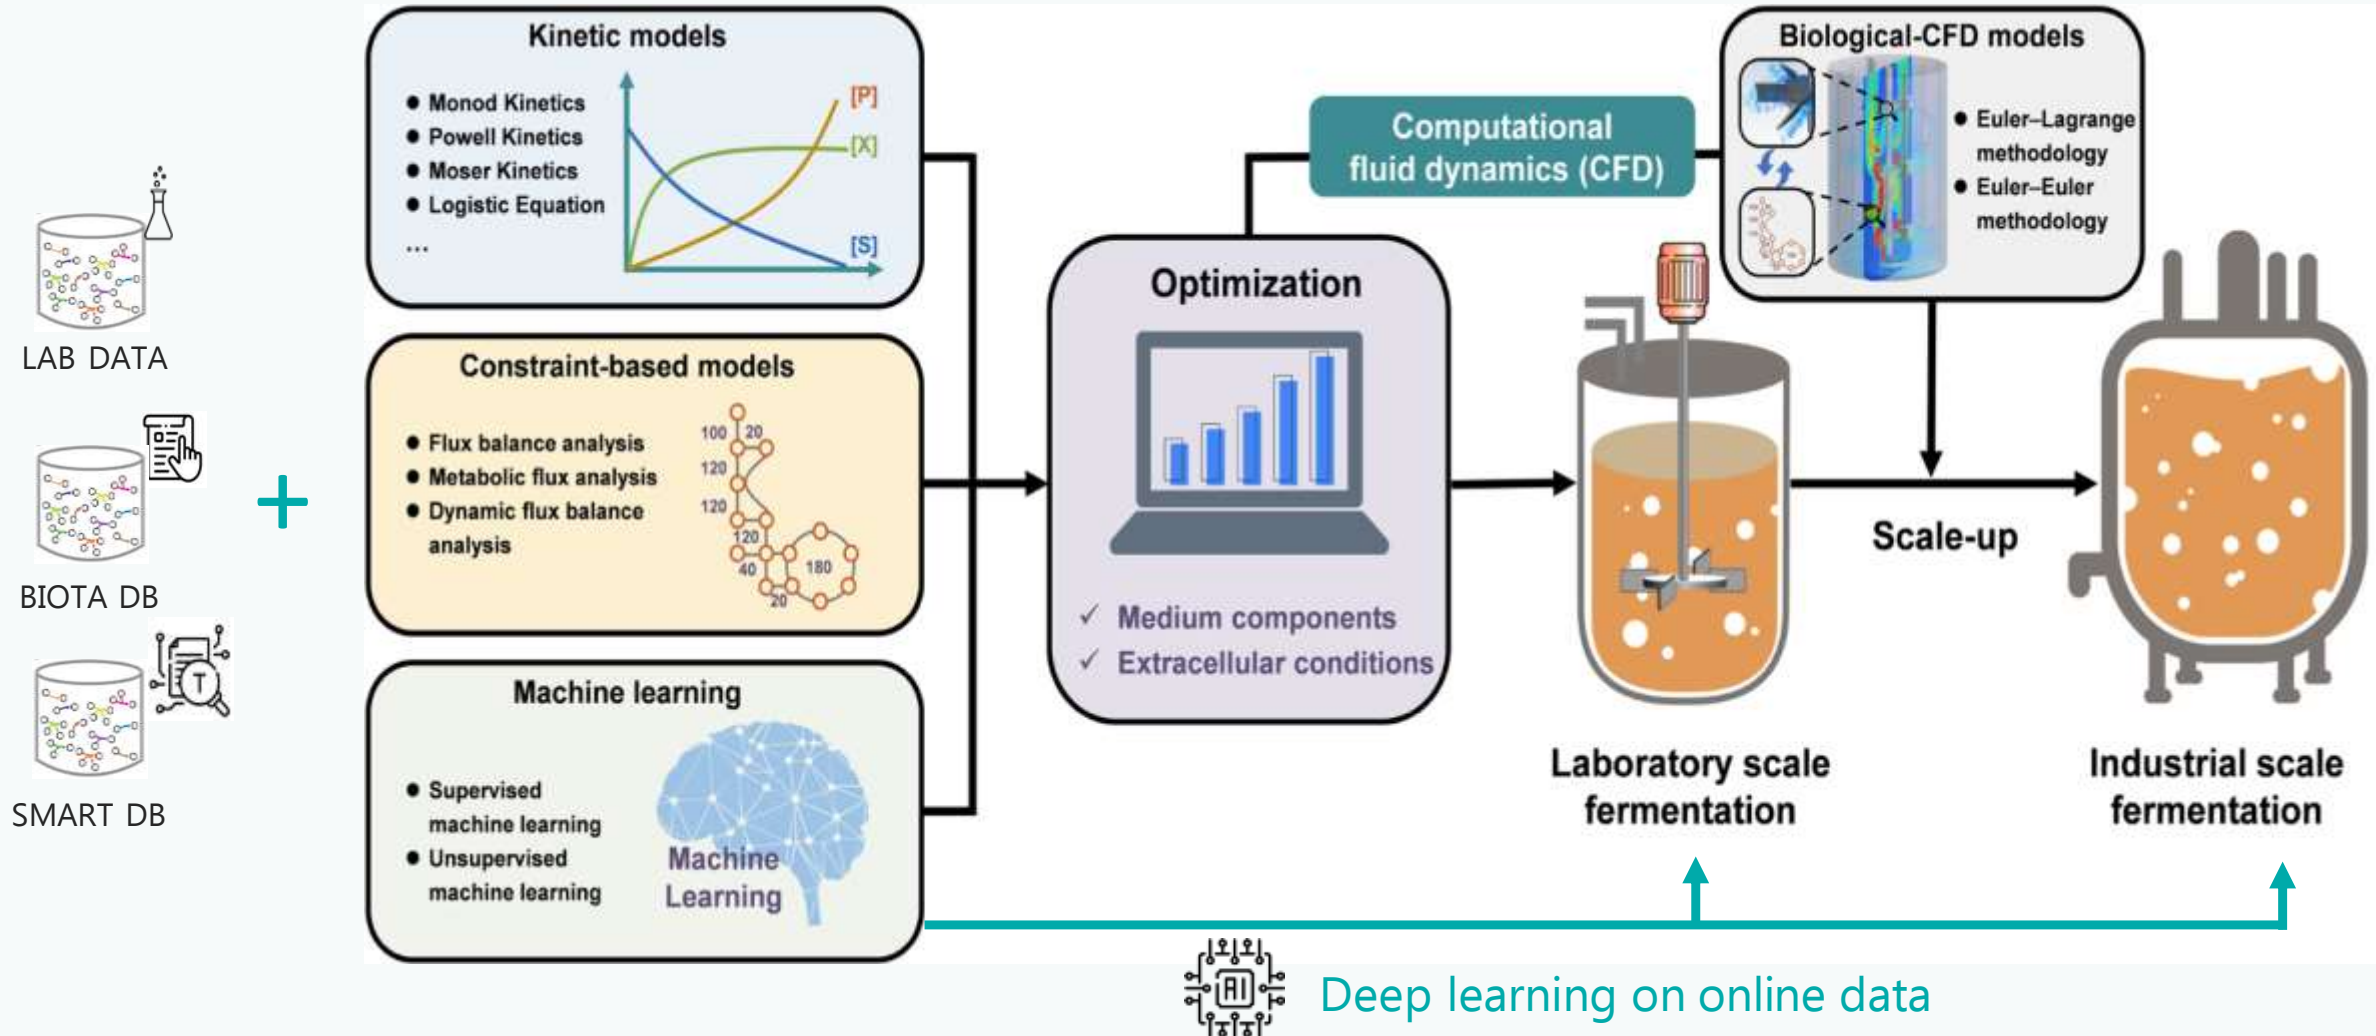

HDS & ISO27001 cloud providers

Cellular Metabolism into a multiscale bioprocessing Model: Mixed model

NextGenBioprocess : 800 k€ (2 years)

Deep learning on online data

Constellab™ promotes sustainable R&D for all

KNOWLEDGE SHARING

LOW CARBON R&D

EDUCATION

Applications & current portfolio

Bioengineering

- Biotechs
- CRO / CDMO
- Universities / Hospitals

- Modes of action
- Target discovery
- Strain/Culture optimisation

Bioproduction

- Pharmas
- CDMO

- Bioprocess optimisation
- Control of bioprocess
